FFVS-2-75

April 1975

**VALUE OF U.S. SEED EXPORTS INCREASED  
IN JULY-DECEMBER 1974; VOLUME DOWN**

Value of U.S. seed exports during July-December 1974 was up nearly \$10 million over the same period in 1973 despite a 20 percent decline in the quantity of seeds exported. This situation resulted from higher unit prices for all major seed groups during 1974, ranging from 10 to 116 percent and averaging better than 50 percent (summary).

Vegetable seeds accounted for the biggest share of the increase in export value, showing a gain of more than \$6 million, followed by pea seeds, which increased nearly \$4 million. Others showing sales gains of \$1 million dollars or more included all forage and bean seeds.

All forage seeds continue to account for nearly one-half of exports in terms of quantity and value. Vegetable seeds accounted for only 7 percent of the volume, but contributed 28 percent of the value of U.S. seed exports.

Forage seed exports declined nearly 30 percent in quantity during the reporting period, but due to a 36 percent increase in unit prices over the previous year the value of exports declined only 4 percent. The European Community, a better-than-\$6 million dollar market, continues to be an important export customer for U.S. forage seeds—particularly West Germany, the Netherlands, France, the United Kingdom, and Italy. Each of these countries took from \$700,000 to nearly \$2 million worth in this reporting period.

Mexico was the most important market for forage seed this reporting period, with purchases valued at

more than \$6 million, the bulk of which—\$4.9 million—was alfalfa seeds (certified and uncertified).

Other countries importing substantial forage seeds from the United States during this period were Canada (\$2.8 million), Japan (\$2.1 million), and Chile (\$1.7 million). Ryegrass—annual and perennial—accounted for over 20 percent of the forage seed exports, followed by Kentucky bluegrass and alfalfa (certified and uncertified), with about 18 percent each.

Mexico was the most important country for U.S. vegetable seed exports, taking nearly 1.5 million pounds during this reporting period, valued at more than \$2 million. Other important customers were France, the Netherlands, Italy, Japan, Canada, and Denmark, in that order. These countries, plus Mexico, took over one-third of the vegetable seeds exported this period. Nearly 80 percent of the vegetable seed exported is listed under "Vegetable seeds, other" in FAS trade statistics, and is not identified as to type.

Exports of pea and bean seeds increased substantially in 1974 over 1973 during this reporting period—in quantity as well as in value. Most of the increase in pea seed exports went to the EC and Sweden, while Australia accounted for nearly all of the increases in bean seed exports.

Flower seed exports showed increases of 26 percent in quantity and 57 percent in value in the last half of 1974, but accounted for only 1 percent of the volume and 4 percent of the value of total U.S. seed exports.
